# PYRUMA PAYS

## IN EVERY HOME

HERE are 101 jobs you can do with Pyruma—jobs that you might have to have a man in to do if you could not do them yourself with Pyruma. That is why Pyruma pays so well in the home. It is so very useful, so thoroughly efficient.

People do not realize what a lot of things can be done with Pyruma. That is the reason for this booklet. It illustrates over 50 uses for Pyruma and each one suggests another and yet another. You are *always* discovering fresh uses for it when once you get the habit of doing things the Pyruma way. There are vastly more than 101 uses really. We are constantly hearing of new ones. No doubt you will find some more too, if you get a tin of Pyruma and develop the Pyruma habit.

# UMA FIRE CMENT

"Pyruma"  
ally pro-  
fixing or  
Fire Brick  
which pur-  
d has no  
as proved  
a ready-to-  
er that in  
homes it  
almost an  
household

**Fixing in broken Fire  
Bricks to Grates or Stoves**  
If bars are badly broken  
away get a few lengths of  
iron bar and place across  
broken bars, fixing ends  
into "Pyruma."

**Cracked Lamp Glass held  
together until new one  
can be obtained**

A small dab of "Pyruma" on  
either side will hold the parts  
together.

**Facing ordinary Brick  
Work to make it Fire-  
proof**

Use as you would ordinary  
cement, previously slightly  
moistening work if porous.

**Setting Tiles in Bakers'  
Ovens**  
Use as you would ordinary  
cement, previously slightly  
moistening work if porous.

FIRE BRICK AND  
FIRE CEMENT  
MANUFACTURERS SINCE 1857

#### Repairing Muffle Furnaces

Thoroughly clean the fire-brick work, take out all small pieces; slightly moisten and Press "Pyruma" well in, either with the hands, a knife or a trowel.

#### Setting Flue Lining in Chimneys

Slightly moisten fire-brick and make the joints as thin as possible.

#### Filling in unnecessary holes in Ebonite Panels for Wireless Sets

Use as you would ordinary putty, cement, or plaster, and blacken over.

Obtainable from  
Ironmongers,  
Builders' Merchants and  
Hardware Stores in  
2lb., 3lb., 4lb., 7lb., 14lb.  
and 28lb. tins

Filling in Holes in Win-  
dow frames which have  
been bored for Wireless  
purposes and then dis-  
carded ordinary  
Use as you would ordinary  
cement, plaster, etc.

SANKEY'S  
**PYRUMA**  
PUTTY  
FIRE  
CEMENT

### Making Models for Japanese Gardens

After shapes have been made they should be dried slowly, if possible in a slow oven, and then placed in red part of a fire until red hot right through.

### Tightening loose Mortices and Joints

Use as you would ordinary putty, cement, plaster, etc.

Obtainable from  
Ironmongers,  
Builders' Merchants and  
Hardware Stores in  
2lb., 3lb., 4lb., 7lb., 14lb.  
and 28lb. tins

### Scouring Baths that have become very dirty

Rub a small quantity of "Pyruma" on to the brush, and then soap. Scrub in the ordinary way.

### Making Fire-lighters

Make a round ball about as large as a tennis ball, using a sawdust and "Pyruma" by volume. When put in the fire the sawdust will burn out leaving a porous structure, which if dipped in paraffin will readily light a fire.

and 28lb. tins*

# PYRUMA

## PUTTY FIRE CEMENT

### Painting Flue Pipes Indoors

Add small amount of water until "Pyruma" is the consistency of thick paint. Apply with an ordinary paint brush.

### Modelling in the Nursery

After shapes have been made they should be dried slowly, if possible in a slow oven, and then placed in red part of a fire until red hot right through.

### Making Registers in Stoves tight when closed

Clean the soot away, take a strip of "Pyruma" and fit it round the opening; close the register and press it on to the "Pyruma," then open it again so that it does not adhere.

### An old tin lined with "Pyruma" used to melt Lead in

No greater thickness is required than about  $\frac{1}{4}$  in. A perfect shape inside can be obtained by slightly moistening the fingers.

Obtainable from  
Ironmongers,  
Builders' Merchants and  
Hardware Stores in  
2lb., 3lb., 4lb., 7lb., 14lb.  
and 28lb. tins

#### Repairing Broken Gas Fuel

Rub "Pyruma" on both pieces where the fracture is and press together with a slight rubbing action, until a very thin joint is obtained.

#### Tobacco Nicotine Filter

Mould discs to shape required, pierce holes and thoroughly dry; place in the fire until red right through.

#### Temporary Sink Grating

Mould discs to shape required, pierce holes and thoroughly dry; place in the fire until red right through.

#### Cleansing the Hands of Grease

A small piece of "Pyruma" with soap readily removes grease from the hands. If a nail brush is used, press a small piece of "Pyruma" on to the brush and soap.

**SANKEY'S  
PYRUMA  
PUTTY  
FIRE  
CEMENT**

Obtainable from  
Ironmongers,  
Builders' Merchants and  
Hardware Stores in  
2lb., 3lb., 4lb., 7lb., 14lb.  
and 28lb. tins

Obtainable from  
Ironmongers,  
Builders' Merchants and  
Hardware Stores in  
2lb., 3lb., 4lb., 7lb., 14lb.  
and 28lb. tins

#### Polishing Rusty Metal

Rub "Pyruma" with a little moisture on to the rusty or tarnished parts with a rag.

#### Scrubbing Tables

Rub a small quantity of "Pyruma" on to the brush and then soap. Scrub in the ordinary way.

#### Repairing and Setting Firebrick Work in all descriptions of Kilns

Thoroughly clean the firebrick work, take out all small loose pieces; slightly moisten and press "Pyruma" well in, either with the hands, a knife or a trowel.

#### Making Small Vases, Ash Trays, etc.

After shapes have been made they should be dried slowly if possible in a slow oven, and then placed in red heat of fire until red hot right through.
